ABOUT BRANNDON

I'm a seasoned **software engineer** with over 15 years of professional experience. My journey began with driving the IT evolution at **The Penny Hoarder** from its inception to a recognized media giant, orchestrating **critical business applications** and optimizing site performance from **2.7 seconds to 0.89**.

Currently at **Headspace**, I've refined my expertise in **Django-based application development**, ensuring **scalable** and **security-focused software architecture**. I actively **mentor junior engineers** and guide software architecture while staying current with Django framework enhancements.

[1] My top 5 professional strengths in order are:

- Strategic
- Activator
- Individualization
- Achiever
- Adaptability

PROFESSIONAL EXPERIENCE

Complete work history: https://branndon.dev/linkedin

Senior Software Engineer

Headspace

2022 - Present

Lead end-to-end development of Django-based applications with focus on scalable architecture, security, and performance optimization.

Mentor junior engineers and implement CI/CD pipelines for streamlined deployments and code quality assurance.

Achievements:

- Architected and delivered Django projects with focus on performance, security, and scalability
- Implemented CI/CD pipelines ensuring streamlined deployments and integrations
- Mentored junior engineers on Django best practices and efficient ORM utilization

Technologies Touched (in order of usage):

Django Python Docker CI/CD Auth0 REST APIs PostgreSQL AWS

Application Architect / Technical Lead

The Penny Hoarder

2015 - 2022

Led technical architecture and development for high-traffic media platform, optimizing performance and implementing scalable solutions.

Managed team growth and technical strategy during company scaling from $4M to $40M annual revenue.

Achievements:

- Optimized site load time from 2.7 seconds to 0.89 seconds, significantly improving user experience
- Designed machine learning-based email content recommendation system
- Led emergency response and hotfix deployment processes for production systems

Technologies Touched (in order of usage):

Python WordPress JavaScript PHP AWS MySQL Redis Cloudflare Docker

TECHNICAL SKILLS

Languages & Frameworks

Python/Django (Expert) JavaScript (Advanced) HTML/CSS (Expert)

Infrastructure & DevOps

AWS/Cloud (Advanced) Docker (Advanced) CI/CD (Advanced)

NOTABLE ACHIEVEMENTS

Performance Optimization

2018

Reduced site load times by 68% through architectural improvements and optimization strategies

Team Leadership

2015-2022

Led technical teams during company growth from 10 to 100+ employees
